

Health Policies

In order to make a sustainable and lasting impact on the health of Palestinians, we seek to stimulate policy dialogue among stakeholders by:

- Contributing to national level policy dialogue.
- Building alliances with national bodies involved in developing and implementing health and social policies.
- Networking with national and regional organizations in various forums and groups sharing the same goals.

Juzoor is a co-founder and active member of the Palestinian Health Policy Forum and Middle East and North Africa Health Policy Forum.

Model Programs

TAKAMOL (addressing gender-based violence at societal and institutional levels)

Youth Parliament (engaging youth in their communities, creating youth leaders)

School-based Nutrition Program (nutrition education, healthy school canteens)

Community-based management of diabetes mellitus (self-care, community support, management and referral)

Child Health Diploma (now a Masters program at Al-Quds University)

ALSO program (Advanced Life Support in Obstetrics)

SRHR (Protecting Adolescents from Gender based Violence through the Promotion of their Sexual and Reproductive Health Rights)

Juzoor for Health & Social Development

**A Palestinian society where all individuals
enjoy wellbeing and health**

Who are we?

Juzoor for Health and Social Development is a Palestinian non-governmental organization working at the national level, dedicated to improving and promoting health as a basic human right. Juzoor ("roots" in Arabic) was established in 1996 by a group of Palestinian experts and pioneers in various fields, particularly the field of community health. Juzoor has become a resource for Palestinian institutions through developing creative model programs in the health and social fields that can be adopted and replicated at the community and national levels.

Our Mission

To promote wellbeing and health as a right for all members of Palestinian society by influencing health and social policies and creating innovative, sustainable development models

Our Strategies

Community

We believe in empowering communities to defend their rights, make informed choices and take control of their health. Our

development models are built in full partnership with local communities and address social determinants of health. Examples of our programs include:

- Promoting healthy lifestyles to enhance quality of life and prevent non-communicable diseases.
- Enhancing family protection by focusing on violence prevention, care and referral.
- Empowering Palestinian society to advocate for health and environmental rights

Juzoor has developed solid community-based models that empower women, engage youth, and promote healthy nutrition.

Capacity Enhancement

Continuous Professional Development (CPD) is an important strategy for quality improvement in the health and social sectors.

Juzoor contributes to improving the performance of health and social service providers by:

- Enhancing professionals' capacity in relevant fields through evidence-based programs.
- Developing curricula, training manuals, job aids and protocols.
- Developing strategic coalitions and relations with relevant professionals and institutions.
- Introducing internationally accredited training programs to the country.

In 2012, Juzoor became the first American Heart Association accredited International Training Center in Palestine. We also hold accreditation from the American Academy of Family Physicians to offer Advanced Life Support in Obstetrics (ALSO) training in the region.
